Brunswick Reports Additional Lithium Assays on Globex’s Lac Escalé (Mirage) Royalty Area

Rouyn-Noranda, Quebec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1MN – Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz, LS Exchange, TTMzero, Düsseldorf and Quotrix Düsseldorf Stock Exchanges and GLBXF – OTCQX International in the US) is pleased to report that Brunswick Exploration Inc. (BRW-TSXV, BRWXF-OTCQB, 1XQ-Frankfurt) has disseminated a press release regarding the first set of 2024 drill results on Globex’s Lac Escalé (Mirage) property including within the Globex one kilometer external boundary area of influence, in the James Bay area of Quebec. Globex retains a 3% Gross Metal Royalty on the Lac Escalé claims and \$ 100,000 per year advance royalty payments commencing at the fifth year of the agreement.

The drill campaign focused on the Central Zone, including the MR-6 and MR-3 dykes (see Brunswick [June 4, 2024 press release](#)), and has **continued to intersect wide and well mineralized intervals** on their extension and at depth.

Highlights include:

- Several new lithium pegmatites were intercepted immediately surrounding MR-6 dyke located in the Central Zone. Significant dyke staking is observed to the East and North of MR-6. The mineralization in the Central Zone is now identified over across multiple holes stretching over 1,000 meters of strike length.
- Multiple significant, near-surface intervals extending the MR-6 dyke **with 1.75% Li₂O over 40.4 meters** in drill hole MR-24-73, **1.07% Li₂O over 24 meters** in drill hole MR-24-74 and **1.25% Li₂O over 16 meters** in drill hole MR-24-72.
- **Three new stacked dykes confirmed** located 250 meters to the East of MR-6 **with 1.25% Li₂O over 26 meters, 1.49% Li₂O over 26.2 meters and 1.93% Li₂O over 22.35 meters** all in drill hole MR-24-76.
- Brunswick Exploration will start metallurgical studies in the coming weeks for the MR-6, MR-4 and MR-3 dykes.

Since the beginning of 2024, Brunswick has drilled approximately 12,000 metres to discover, delineate and expand the spodumene bearing pegmatites.

Highlights of the 2024 summer drill campaign in today’s Brunswick press release includes the following:

Highlights from 2024 Summer Drilling Program Mentioned in The Current Brunswick Press Release

Hole ID	Dyke	From (m)	To (m)	Length (m)	Li2O (%)	Ta2O5 (ppm)
MR-24-72	MR-6	3.4	5.2	1.8	1.05	223
MR-24-72		21.52	37.45	15.93	1.25	255
